Sunday 30 May 2021
Matthew 28:16-20
The Most Holy Trinity

My name is _____

TELL THE WORLD

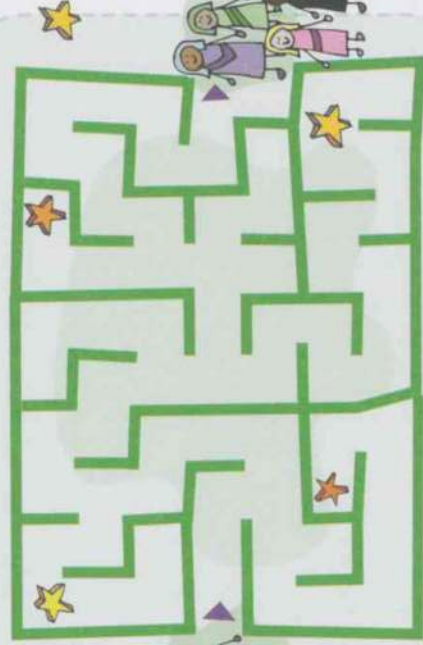

The disciples went up a mountain.

Join the dots to see who met them there.

Go, make disciples

Jesus asked the disciples share his message of love. Guide the disciples to their friends so they can tell them about Jesus.

To make

Jesus told his friends to baptise people in the name of the Trinity: **Father, Son and Holy Spirit.**

Colour and decorate the pyramid.

Ask a grown up to help you make it.

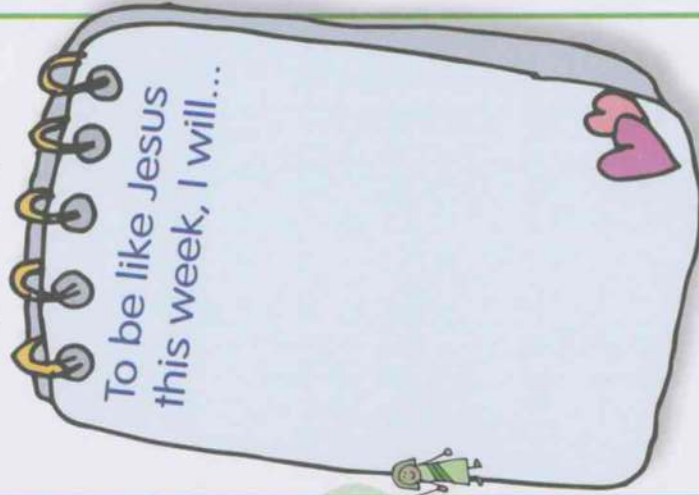

IN THE GOSPEL TODAY

The disciples meet Jesus on a mountain in Galilee. Jesus gives them a very important task: he asks them to go and make other people his disciples, baptising them in the name of the Father, the Son and the Holy Spirit. Jesus tells his friends that he will be with them always.

Be like Jesus

We can teach the world about Jesus by living as Jesus did and loving other people.

What can you do this week to be just like Jesus? Draw or write your ideas on the Action List.

A PRAYER TO SAY

Dear Jesus, I know you love me. Please be with me always, as you were with the disciples. Amen.

All Hyfire products are developed by fire industry pioneers in Trieste, Italy, the global centre for wireless fire device design. The wireless range includes all devices required to build a fully wireless commercial fire system, including manual call points, remote indicators, visual indicators, sounders, sounder bases and output/input modules. A range of addressable translators and expanders are available, processing up to 32 devices each, with the scale of the system limited only by the number of devices that the fire panel can handle. Devices can be quickly and easily pre-programmed onsite to increase the speed of installation and reduce time on site.

Martha Cooney, Parish Coordinator for St Mary's & Michael's, said: "When Hyfire wireless devices were first suggested, we had some concerns about battery life and reliability, but the Guardian Fire team quickly put our minds at rest. The technology behind these systems has clearly moved on rapidly in recent years, with wireless now the equal of wired alternatives, and the reduced intrusion in the fabric of our beloved church was also a major selling point."

Hyfire was launched in 2002, bringing to market some of the first commercial wireless detection and alarm devices fully certified to EN54. Since then, the Hyfire brand has become synonymous with quality, reliability and innovation in the commercial fire sector. Hyfire devices are available for Advanced or Kentec panels and come with a five-year warranty, backed up by a dedicated partner programme, to ensure the best survey, installation, commissioning, after sales service and exceptional technical support.
